

upstream
research™

What We Do

Upstream Research™ is a health information company launching the world's first environmental health report for a given location. We reveal historic and emerging toxic risks to air, water and soil quality for any location in the United States together with rates for chronic diseases such as cancer, heart disease, diabetes

Why We Do It

We believe in empowering individuals and organizations to more fully understand disease and environmental health risks where they live, work and play.

www.upstreamresearch.com

About

Based in Seattle, WA Upstream Research™ is a startup founded on the belief that Where You Live Matters.™

Upstream analyzes open and proprietary data to offer **Upstream Reports™** of past, present and future environmental and health risks for any location in the United States.
